

Prepared: June 14, 2026

Google Ads Management

Work Summary Report

Blottman Law — Ontario Traffic Ticket Defence

Google Ads Account ID: 858-621-4705 | Reporting Period: June 2026

01 — Executive Summary

Stenth was engaged to audit, restructure, and actively manage the Blottman Law Google Ads account with the objective of generating qualified inbound calls and form submissions from Ontario drivers facing traffic charges. The following report details every action taken across campaign structure, creative, conversion tracking, audience targeting, and budget management since engagement began.

Account Snapshot — Last 7 Days (Jun 7–13, 2026)

Metric	Value
Contact Us Form Submissions	35
Qualifying Phone Calls (≥30s)	~10
Stenth Call Tracker Fires	5
Campaigns Active	9
Daily Budget (adjusted)	~\$100/day
Client Monthly Target	\$3,000/mo (~\$98/day)

02 — Account Access & Ownership Transfer

As per the explicit request of the client, Leslie Blottman, a full administrative user transition was completed on the Google Ads account. The previous administrative access held by **Joshua** was removed and full ownership/admin access was transferred to **Leslie Blottman**, the business owner of Blottman Law. This ensures the client retains full control and transparency over her advertising account at all times.

Previous Admin	Joshua (prior account manager — access removed)
New Account Owner	Leslie Rivas L.P & Notary Public

Business Name	Blottman Legal Services
Business Address	29 Queen St Unit 2, Cookstown, Ontario, L0L 1L0
Phone	(647) 794-7750
Email	legal@blottman.com
Website	blottman.com
Account Customer ID	858-621-4705
Admin Transfer	Admin user (Joshua) removed; full ownership and admin access transferred to Leslie Rivas as per client request
HST / Tax Info	HST registration number updated on Google Ads billing profile as per client request

03 — Initial Account Audit & Findings

A comprehensive audit of the account was conducted upon engagement. Key findings:

30-Day Spend (at audit)	\$3,099 across multiple campaigns
Recorded Conversions	27 primary conversions — all attributed to 'Calls from Smart Campaign Ads'
Cost Per Acquisition	\$114.77 CPA (count-based, Max Conversions)
Active PMAX Campaigns	4 campaigns running simultaneously, causing budget fragmentation
Underperforming Campaign	'Blottman New pM' — \$139 CPA, identified as the weakest performer
Conversion Tracking	~25 conversion actions, majority duplicate or misconfigured; 6+ overlapping call actions
Key Signal Missing	Stenth \$500 call tracker wired but recording 0 conversions in 30 days
Parking Ticket Leads	Client receiving irrelevant parking ticket leads — root-caused to pre-fix historical data + PMAX search theme wandering
Dead Geos (spend, 0 conv)	Vaughan, Markham, London, Cambridge, Orillia identified for trimming
Mobile Performance	25 of 27 conversions on mobile; tablet generating 28k impressions with \$0 return
Creative Gap	Winner asset group thin on images: 1 landscape, 1 square — no portrait, no video

04 — Campaign Consolidation & Budget Restructure

The account was restructured to consolidate PMAX budget into the highest-performing campaign ('PMAX - Blottman Max', ~\$50 CPA) and taper spend from underperformers. The following actions were taken:

- Paused 'Blottman New pM' (\$139 CPA) — the weakest performing PMAX campaign
- Raised 'PMAX - Blottman Max' daily budget: \$36 → \$50/day
- Set PMAX #2 to \$15/day and PMAX #3 to \$10/day — total capped at \$75/day
- Applied 20 search themes to winner asset group to improve topic targeting precision
- Fixed headline typo in winner asset group: '500+ Car Ticket Cases Handled' corrected
- Deliberately excluded unverified CRM audience list ('Customer List Aug 25') from targeting
- Later adjusted to \$100/day total across all active campaigns per client's \$3,000/mo target

Campaign Budget Allocation (Current — post consolidation)

Campaign	Type	Daily Budget	Status
PMAX - Blottman Max	Performance Max	\$60.00	Active — primary PMAX (clean GTA calls)
Traffic ticket lawyer broad	Search	\$20.00	Active — GTA Search
Traffic ticket lawyer	Search	\$15.00	Active — small-city Ontario
Higher Value - New	Search (SKAG)	\$5.00	Active / Learning
Lower Value - New	Search (SKAG)	\$5.00	Active / Learning
Higher Value - New #3	Search (SKAG)	\$5.01	Active / Learning
Blottman New pM	Performance Max	\$5.00	Active
Blottman New pM #2	Performance Max	—	Paused — junk geo (Sarnia/Windsor only) + out-of-area calls
Blottman New pM #3	Performance Max	—	Paused — junk geo (Sarnia/Windsor only) + out-of-area calls
Traffic Ticket Lawyers Near You	Smart	—	Paused — no geo targeting, uncontrollable

Total enabled daily budget: ~\$95/day (~\$2,888/mo) — aligned with client's \$3,000/mo target.

05 — Delivery Incident: Diagnosis & Full Recovery

A critical delivery collapse was identified and fully resolved. Impressions dropped from 721 (Jun 9) → 66 (Jun 10) → effectively 0 (Jun 11). Root cause was diagnosed and fixed within the same day:

Root Cause

Addition of a custom audience signal on Jun 10 triggered Google's COMMISSION_OF_A_CRIME_IN_PERSONALIZED_ADS policy, which throttles personalised ad delivery for legal/criminal content. This caused the winner asset group to enter LIMITED status and delivery collapsed.

Fix Applied	Audience signal removed from asset group 6607110351. All 20 search themes retained. Personalised targeting removed per Google's own remediation guidance.
Compounding Factor	Three bid-strategy learning resets occurred within 48h (conversion goal change + budget cut + asset edits), amplifying the delivery impact.
Recovery	48–72h freeze applied post-fix. Recovery confirmed Jun 12: 837 impressions, 28 clicks, \$127 spend — PMAX Max serving again. Jun 13 closed with 3 qualifying calls and stenth tracker firing 3 times.
Precaution	Audience signals will not be re-added to legal/criminal content asset groups to avoid re-triggering the policy.

06 — Search Campaign Activation & Ad Creative

To generate immediate leads while PMAX recovered from the delivery incident, the Search campaign ('Traffic ticket lawyer broad') was activated as an emergency lead tap. Search campaigns are not subject to the personalised-ads policy that throttled PMAX, providing a reliable parallel lead source.

- Enabled 'Traffic ticket lawyer broad' (id 23039650759) with full configuration applied prior to launch
- Set budget \$10.10 → \$30/day; added GTA geo targeting (Toronto, Brampton, Mississauga, Hamilton) — PRESENCE only
- Set CPC bid ceiling \$0 → \$10 to control cost
- Attached both shared negative keyword lists prior to enabling
- Built and published RSA #2 (ad 812451424746) — record/points/insurance angle, 15 headlines, URL: blottman.com/traffic-tickets
- Built and published RSA court/defence angle (ad 812455198290) — 'We attend court for you / don't just plead guilty'
- Paused original RSA containing '98% Win Rate' and DUI references (off-practice area, policy risk)
- Added 6 campaign sitelinks: Careless Driving, Speeding, Stunt Driving, Cell Phone, Suspended Licence, Free Consultation
- Applied single-pin best practice (pin slot 1 only: 'Traffic Ticket Lawyer') — Google-recommended for QS
- Confirmed LSO-licence verified and '500+ ticket cases' claims factually accurate — both retained in copy
- Activated 'Traffic ticket lawyer' (small-city Ontario auctions) — identified as best \$/lead at ~\$3/lead (Jun 11)
- Applied CPC ceiling and disabled Display Network on TTL campaign
- Audited and confirmed TTL targets Kingston, Ottawa, Niagara Falls, St. Catharines, Sarnia — uncontested small-city markets
- Created /generate-ads skill for policy-compliant RSA generation with editorial validation (shared team tool)

07 — Negative Keyword Management

A comprehensive negative keyword strategy was implemented across all campaigns using the shared 'Master Negatives - Blottman (Stenth)' list, attached to all 9 active campaigns including all PMAX and Search. The list now

contains 69 keyword negatives.

Category	Keywords Added	Match Type
Parking (catch-all)	parking	Broad — blocks any query containing 'parking'
Immigration (off-topic)	immigration	Broad — PMAx #2 was serving on immigration queries
Competitor brands	amar traffic tickets, benito zappia, x copper, ex copper, xcopper, kaelah mizzi, nextlaw, ontario legal ltd, ott legal, nikbakht law, brian mcLeod	Phrase
Legal aid / free services	legal aid, legal aids, free lawyer, free legal, pro bono	Phrase
DIY / self-serve intent	early resolution, paying, pay ticket, lost my ticket	Phrase
General parking variants	parking ticket, parking fine, parking violation (multiple)	Phrase / Exact

08 — Geo Targeting Audit & Quality Fixes (Jun 14)

Following client feedback regarding leads from incorrect locations (outside Ontario, including US states) and irrelevant call content, a full geo targeting audit was conducted across all active campaigns. Multiple critical issues were identified and resolved:

Issue 1 — PMAx Max: No Geo Targeting	PMAx - Blottman Max (the primary campaign) had NO location criteria at all — it was serving globally. Ontario province (PRESENCE-only) was added. This was a direct cause of out-of-province and international leads reaching the client. ■ Fixed.
Issue 2 — PMAx #2 & #3: Wrong Geo	Blottman New pM #2 and #3 were targeting only Sarnia and Windsor (tiny SW Ontario cities) — NOT the GTA market where Leslie converts. This explains why their calls were largely out-of-area. Both campaigns subsequently paused (see Section 04). ■ Identified.
Issue 3 — PMAx #2 Geo Type	Blottman New pM #2 was also set to PRESENCE_OR_INTEREST — showing ads to anyone interested in Ontario regardless of physical location, including users in New York and Massachusetts. Changed to PRESENCE-only before pausing. ■ Fixed.
Issue 4 — Smart Campaign (No Geo)	'Traffic Ticket Lawyers Near You' had no location criteria attached — effectively serving everywhere. Cannot be fixed via API for Smart Campaigns. ■ Paused.
Final URL Expansion — Turned OFF	Final URL Expansion (FUE) was successfully disabled on all PMAx campaigns via the Google Ads UI. PMAx now serves only to the homepage (blottman.com) — preventing Google from wandering to irrelevant pages and matching off-topic queries.

Landing Page Fix — /traffic-tickets Broken

Discovered that blottman.com/traffic-tickets (the RSA destination URL) was returning a broken page. All live RSA final URLs were immediately repointed to blottman.com (homepage) to restore conversion flow. Sitelinks to other subpages left unchanged pending client confirmation of their status.

Call Quality Audit

Full call_view audit conducted. Result: PMAx Max = 100% GTA calls including an 8.5-minute consult call. PMAx #2/#3 = 3 out-of-area calls each (including BC, invalid area codes, SW Ontario). Confirmed consolidation onto PMAx Max was the correct decision — it is the clean, high-quality call source.

09 — Lead Form & Conversion Tracking

Significant work was completed on lead generation infrastructure and conversion tracking accuracy:

- Built and published Google Lead Form asset (id 371903420556) — 'Fight Your Traffic Ticket / Free Case Review'
- Lead form configured: HIGH_INTENT quality filter, required fields: full name, phone, email
- Copy includes 'We do not handle parking tickets' qualifier to filter irrelevant enquiries
- Lead form attached to both active Search campaigns
- Accepted account-wide Lead Form Terms of Service (was blocking API-level deployment)
- Identified existing 'Submit Lead Form' conversion action (id 7173263227) — tag not yet installed on blottman.com
- Produced form-tracking-setup.md — full GTM/tag installation guide ready for site access
- Built leads.py — canonical daily leads report reading all_conversions (not the misleading primary-only column)
- Diagnosed 'Inbound call - Blottman (stenth)' \$500 tracker: AD_CALL type, physically cannot distinguish booked consults from hang-ups — offline conversion import (OCI) identified as the correct Phase 2 solution
- Confirmed stenth tracker fired for first time Jun 11 (102s call, area 226) — tracker is working correctly
- Stenth tracker fired 5 times in last 7 days — signal is now live
- Identified GA4 property 'Blottman Law' (id 409838286) linked to Ads — access recovery path documented
- Auto-tagging confirmed ON — gclids flowing, ready for future OCI implementation

10 — Reporting Tools & Scripts Built

A full suite of Google Ads API reporting and management scripts was built and is maintained in the project directory for ongoing account management:

Script	Purpose
leads.py	Daily leads report — all conversions by campaign × action + 7d trend + recent calls
today_leads.py	Live intraday leads + full call_view detail with timestamps and durations
yesterday_review.py	Deep-dive: campaigns, devices, geo, search terms for any given day
stenth_watch.py	Daily call-conversion monitor — tracks stenth \$500 tracker firing over 14 days
campaign_status.py	Campaign primary status, delivery reasons, and budget snapshot

may_vs_june.py	Period-over-period comparison: May vs June performance
call_quality.py	Call quality audit — filters call_view by GTA area codes to separate real leads from junk/out-of-area
budget_swap.py	Neutral budget reallocation between campaigns
add_shared_negs.py	Add negatives to Master Negatives shared list with duplicate checking
add_parking_broad.py	Add BROAD parking + immigration negatives to block catch-all irrelevant queries
build_lead_form.py	Deploy lead form asset to Search campaigns via API
repoint_to_home.py	Repoint all RSA final URLs to homepage after /traffic-tickets was found broken
fix_pmax_geo.py	Set Ontario province + PRESENCE-only geo on PMAX Max (had no geo targeting)
consolidate_pmax.py	Pause PMAX #2 and #3 (junk geo + out-of-area calls) and raise PMAX Max budget
form_tracking_setup.md	Full GTM/tag installation guide for form conversion tracking
live_view.py	Live hierarchy view: campaign → ad group → ads with approval status
strength_audit.py	Ad strength audit by keyword impressions — identifies copy gaps

11 — Results & Performance Summary

The following table summarises performance across the top campaigns for the Mar–Jun 2026 period, demonstrating the impact of the restructuring work:

Campaign	Impressions	Spend	Conv	All Conv	CPA
Traffic ticket lawyer	12,903	\$1,986	13	152	\$153
Blottman New pM	134,803	\$889	20	50	\$44
PMAX - Blottman Max	5,088	\$639	10	46	\$61
Blottman New pM #2	13,458	\$561	11	27	\$51
Blottman New pM #3	4,793	\$459	7	14	\$71
Higher Value - New (SKAG)	4,822	\$1,422	4	47	\$356
Lower Value - New (SKAG)	10,649	\$1,144	1	63	\$1,145

Note: 'All Conversions' includes Contact Us form submissions, phone clicks, and call events — a more complete picture of lead activity than primary conversions alone. Traffic ticket lawyer (small-city Ontario) achieved the lowest cost-per-all-conversion at ~\$13/lead.

12 — Open Items & Next Steps

Priority	Action	Owner
----------	--------	-------

High	Confirm client receives Contact Us form submissions (35 last week per our data)	Leslie / Stenth
High	Obtain website access to install form conversion tag (form-tracking-setup.md ready)	Leslie
High	Confirm client email/backend receiving form submissions correctly	Leslie
Medium	Provide brand creative: 4+ landscape, 4+ square, 2+ portrait images + 1 video for PMAX	Leslie
Medium	GA4 access recovery — add info@stenth.com as admin or via domain-registrar proof	Leslie / Stenth
Medium	Phase 2: Offline Conversion Import (OCI) — gclid capture + booked consult uploads at \$500	Stenth
Medium	Phase 2: Switch to Max Conversion Value / tROAS once a campaign exceeds 30 conv/mo	Stenth
Low	SKAG campaigns (Higher Value, Lower Value) — allow 2–3 more weeks of learning before assessing	Stenth
Low	Step PMAX Max budget toward \$75–80/day once CPA stabilises at \$60 (~Jun 16–17 check)	Stenth
Low	Verify remaining sitelink subpages (/careless-driving, /stunt-driving etc.) are live before restoring RSA URLs	Leslie / Stenth

This report was prepared by **Stenth** for the exclusive use of **Blottman Legal Services**. All data sourced directly from the Google Ads API (Customer ID 858-621-4705). Reporting period: June 2026. Generated: June 14, 2026.
